Sir:

Applicants have noted that the substitute specification filed with the preliminary amendment on August 15, 2006 had tables cut off at the bottom (incomplete) at pages 42, 49, 61 and 72. Accordingly, a corrected version of the substitute specification is submitted herewith. This corrected substitute specification contains no new matter as the complete tables are present in the International Application and in the original English translation.

Respectfully submitted,  
Bacon & Thomas
